Proposal: Verity for D & S Electric Works

Prepared for: D & S Electric Works (DSEW), 109, Industrial Area Extension, Rau, Indore 453331, Madhya Pradesh
Prepared by: PlotArmour, GSTIN 07TQDPS9711L1ZT, +91 87440 69597, team@plotarmour.in, [address]
Date: 20 October 2026
Valid for: 60 days

> **Status: NEGOTIATION DRAFT, pending company approval.** Items in [square brackets] are open company decisions. The company details, terms and ownership clauses are not final until the company approves them in writing.

1. What we are offering

Verity is our own operations platform. We own it. We are offering DSEW a **perpetual licence to use Verity, configured for DSEW, for a one-time fee**, in the options you asked for. Everything is part of Verity itself: no third-party software to buy and no separate bespoke code base to maintain.

We built the scope from your enquiry **and from our own understanding of how DSEW works**: an engineered, one-off product only stays trustworthy if what was approved is what was built, and nothing leaves the factory without its checks.

	Option 1: MVP	Option 2: Complete ERP
What it is	A usable core engineering and manufacturing ERP: enquiry to quotation to order, engineering and BOM, materials, manufacturing, travellers, quality	All 19 modules of your enquiry plus scoped AI, with deeper workflows and cross-module links
One-time licence and implementation fee (ex GST)	**₹3,25,000**	**₹4,80,000**
GST at 18% (illustrative; IGST expected as our GSTIN is registered in Delhi and DSEW is in Madhya Pradesh; confirmed at invoicing)	₹58,500	₹86,400
Total including GST	**₹3,83,500**	**₹5,66,400**
12-month bundled fee (section 7), ex GST	₹1,02,000	₹1,02,000
Contract value for the first 12 months, ex GST	**₹4,27,000**	**₹5,82,000**
Delivery	[Company to confirm]	8 weeks (Option 3 below)

Option 3: phased implementation. The Complete ERP delivered in four phases over 8 weeks, each with its own price and demonstration (section 6 and document 2). It is the same ₹4,80,000, not an additional charge.

Licence for either option: perpetual, for DSEW's own business, one site, up to 15 named users. No annual or per-user licence fee; the only recurring charge is the 12-month bundled fee. More users, sites or new modules are quoted separately.

Scope in one line. The MVP is roughly 55% of the Complete ERP's functional scope (a planning estimate, not a measured figure). It is priced at about 68% of it, because the foundations (architecture, sign-in, permissions, numbering, deployment, testing, documentation) are needed in both.

2. Included in both options

Responsive interface with searchable, filterable tables; role-based permissions; audit trail; configurable numbering for the agreed document types; backup and a tested restore; installation on one DSEW Linux VM; testing and UAT; training; administrator and user guides and runbooks; a documented export of DSEW's data (records as CSV, files in original form with an index); and the 12-month bundled fee terms in section 7.

3. Option 1: MVP, Core Engineering and Manufacturing ERP

One connected workflow: **customer enquiry, quotation and order confirmation, project, engineering documents and BOM, material availability and purchasing, manufacturing job and traveller, quality inspection and release, delivery readiness.** Creating a manufacturing job identifies its BOM, shows material availability, records material issues, tracks operations and the traveller, and blocks final release while mandatory quality checks are incomplete.

#	Module / deliverable	Price (₹, ex GST)
1	CRM, enquiry and quotation management	35,000
2	Project and order management	25,000
3	Document management and configurable numbering	35,000
4	Basic engineering and BOM management	35,000
5	Basic procurement and inventory management	40,000
6	Manufacturing execution and job management	40,000
7	Manufacturing traveller management	25,000
8	Core quality management	30,000
9	Operational dashboards and basic notifications	15,000
	Module development subtotal	2,80,000
	Requirements finalisation and workflow design	12,000
	Application configuration and deployment	10,000
	Integrated testing and UAT support	12,000
	Documentation, training and handover	11,000
	Implementation subtotal	45,000

#	Module / deliverable	Price (₹, ex GST)
	MVP total (ex GST)	**3,25,000**

MVP boundary. Basic BOMs, material records, purchasing, stock balances and job-level material allocation are included. Excluded: advanced MRP, barcode-driven genealogy, finance and accounting, payroll and HR, dispatch workflow, contracts and compliance tracking, AI, and advanced enterprise workflows.

4. Option 2: Complete Integrated ERP

#	Module / deliverable	Price (₹, ex GST)
1	CRM, enquiry, quotation and sales order management	30,000
2	Advanced project management	20,000
3	Engineering and product lifecycle management	30,000
4	Document management and controlled document workflows	25,000
5	Manufacturing execution	30,000
6	Manufacturing travellers and process documentation	15,000
7	Quality management system	25,000
8	Barcode, QR code and traceability	15,000
9	Procurement and vendor management	20,000
10	Inventory and warehouse management	20,000
11	Production planning and basic MRP	20,000
12	Testing and equipment management	15,000
13	Finance and accounting, built inside Verity	20,000
14	HR and payroll management	15,000
15	Dispatch and logistics	10,000
16	Contracts, compliance and risk	10,000
17	Management dashboards and business intelligence	15,000
18	Notifications and workflow automation	15,000
19	AI, scoped core capabilities (section 9)	15,000
	Module development subtotal	3,65,000
	Requirements analysis and solution architecture	25,000
	UI/UX design and workflow configuration	20,000
	Cross-module integration and deployment	25,000
	Integrated testing and UAT support	20,000
	Documentation, training and knowledge transfer	15,000

#	Module / deliverable	Price (₹, ex GST)
	Implementation subtotal	1,05,000
	Cross-module dependency coordination and stabilisation	10,000
	Complete ERP total (ex GST)	**4,80,000**

Complete boundary. All 19 modules and scoped AI at the **agreed baseline depth**: standard workflows and limited customisation. The detailed specification and module acceptance criteria fix that baseline before development starts. It is not an unlimited implementation of every advanced capability in the enquiry. Explicitly outside it: advanced AI, bulk historical data migration, statutory compliance certification, and any integration with third-party systems.

Price difference: ₹1,55,000, so Option 2 costs about 47.7% more than Option 1 for the extra breadth.

5. MVP versus Complete, module by module

Module	Option 1: MVP	Option 2: Complete
CRM	Customer records, enquiries, follow-ups	Full pipeline, RFQ and tender tracking, correspondence, complaints, advanced history
Project management	Projects, milestones, tasks, deadlines, status	Dependencies, WBS, budgets, risk and change management, advanced reporting
Enquiry, quotation, sales	Quotations, basic costing, revisions, order confirmation	Advanced costing, alternative offers, PO comparison, sales orders, retention, LDs, milestone billing
Engineering and PLM	Product and component records, BOMs, drawing attachments, revisions	Multi-level BOMs, engineering change orders, formal design approvals
Document management	Repository, numbering, revision history, search, basic approvals	Full controlled-document lifecycle, transmittals, acknowledgements, advanced audit and distribution
Manufacturing	Job cards, operation sequences, material allocation, status	Advanced routing, work-centre scheduling, labour tracking, WIP, subcontracting, bottleneck analytics
Travellers	Configurable travellers, checkpoints, sign-offs	BOM-driven travellers, QR codes, full genealogy, customer-facing formats
Quality	Incoming, in-process and final inspection, NCRs, quality release	QAP/ITP, CAPA, audits, calibration, supplier quality, analytics
Barcode, QR, traceability	Basic material and job references, manual tracking	Barcode scanning, batch, heat and serial tracking, product genealogy
Procurement	Suppliers, purchase requests, receipts, purchasing	Approval workflows, RFQs, comparative statements, supplier performance, subcontracting
Inventory	Stock balances, material issues, reservations, shortages	Multi-warehouse and bins, valuation, reconciliation, ageing, advanced traceability
Planning and MRP	Job priorities, manual material planning	Automated BOM-based MRP, capacity planning, scheduling, shortage recommendations
Testing and equipment	Basic test records and attachments	Dedicated test workflows, automated reports, calibration, preventive maintenance

Module	Option 1: MVP	Option 2: Complete
Finance and accounting	None	Invoicing and payment status, GST support, reconciliation, receivables and payables, profitability, all inside Verity
HR and payroll	None	Employees, attendance, leave, payroll, statutory calculations, competency tracking
Dispatch	Delivery readiness tracking	Dispatch planning, packing lists, challans, shipment tracking, partial deliveries
Contracts and risk	Basic project and order references	Obligations, bank guarantees, LD exposure, insurance and NDA tracking, risk registers
Dashboards	Operational dashboards for the included workflows	Cross-department KPIs, profitability, ageing, cash flow, supplier and resource analytics
Notifications	Basic reminders and alerts	Configurable workflow engine, escalations, cross-module triggers, automated documents
AI	Not included	Scoped core capabilities (section 9)

6. Option 3: the Complete ERP in four phases over 8 weeks

Phase	Weeks	Content	Price (₹, ex GST)
1. Foundation and commercial core	1-2	Requirements and architecture, sign-in and roles, CRM, quotation and sales order, projects, document numbering, initial engineering masters and BOM	1,20,000
2. Supply chain and manufacturing core	3-4	Engineering revisions and release, procurement, inventory and material allocation, planning and basic MRP, manufacturing jobs and operations	1,35,000
3. Quality, traceability and operational controls	5-6	Travellers, quality and NCRs, barcode/QR and traceability, testing and equipment, dispatch, contracts and compliance	1,30,000
4. Business modules, validation and go-live	7-8	Finance and accounting, HR and payroll, dashboards, notifications and automation, scoped AI, end-to-end testing, UAT, deployment, training, handover	95,000
Total	**8 weeks**		**4,80,000**

Phase prices allocate the Option 2 total; payments follow the milestones in section 8. Schedule, acceptance criteria and assumptions are in document 2. Eight weeks is a compressed plan for a broad scope: it holds only if the assumptions in document 2 hold.

7. The 12-month period: warranty, testing support and maintenance

DSEW will test Verity in its real workflows for **12 months from go-live**. For that whole period we charge one bundled fee of **₹8,500 per month** (₹1,02,000 ex GST for 12 months; ₹10,030 per month including 18% GST), invoiced [monthly in advance, company to confirm]. It starts at go-live and ends after 12 months, for either option.

The bundled fee replaces a separate warranty, a separate testing-support charge and a separate maintenance contract. None of them is charged on top during the 12 months. It covers exactly three things:

1. **Defect warranty.** Correcting any reproducible defect where Verity does not meet the signed requirements, whether found in UAT or at any time in the 12 months. A defect caused by DSEW's own changes, hardware, network or third-party software is not a Verity defect.
2. **Testing and UAT assistance.** Helping DSEW run the agreed UAT scripts and test real jobs, reproducing and triaging each reported issue, recording DSEW's feedback, and reviewing reported issues and feedback with DSEW at an interval agreed at the start.
3. **Routine maintenance.** Keeping the DSEW installation on Verity's tested releases (stability and security updates), helping run and check backups and restores, and administrator guidance by email (team@plotarmour.in) and phone (+91 87440 69597). No response-time commitment is made.

Not covered. Each is quoted separately and needs DSEW's written approval before any work: new features; changes to agreed workflows or to a requirement DSEW has already accepted; additional integrations; new product families, reports, formats, users or sites; data cleansing or migration beyond the agreed imports; hardware or network faults; and on-site work. DSEW's testing feedback is used to prioritise and quote these.

After the 12 months, no warranty, testing support or maintenance is included. Any support afterwards needs a separately agreed renewal in writing. No annual contract is part of this offer.

Travel: the fee assumes remote work apart from the site survey visit. [On-site days: company to decide whether included or charged at cost.]

8. Payment (proposed)

Each invoice carries GST at the rate then applicable. Payment terms: [15 days] from invoice. The same milestone structure applies to Option 1, Option 2 and Option 3.

Milestone	Share	Option 1 ₹ ex GST	Option 2 / 3 ₹ ex GST
1. Project initiation: signed order, product owner named, requirements signed off	30%	97,500	1,44,000
2. Approved architecture and first working release accepted, or deemed accepted after 5 working days	30%	97,500	1,44,000
3. Feature completion and UAT build	30%	97,500	1,44,000
4. Final acceptance and handover (payable anyway if DSEW-side delays hold go-live up for more than [15 working days] after UAT passes)	10%	32,500	48,000
Total	**100%**	**3,25,000**	**4,80,000**

GST at 18% is added to each invoice. The 12-month bundled fee is invoiced separately from go-live. Each milestone has written deliverables and acceptance criteria in the specification.

9. Artificial intelligence (Option 2 only, scoped)

Option 2 includes AI at core, agreed depth: use cases fixed in the specification, never an approver, and always inside each user's permissions. It does not approve quotations, release documents, alter records or authorise quality releases, and no essential workflow depends on it. A general local AI platform, model training and extensive customisation are outside the fee. Each item below is proven in a small pilot against agreed sample documents and accuracy thresholds.

AI capability you listed	Local on DSEW's server	External service
Natural-language search across authorised documents and records, including past quotations, POs, BOMs and jobs	Feasible with open models and search	Not needed
Retrieval from specifications, QAPs, travellers and project history	Feasible	Not needed
Document classification and metadata extraction	Feasible, accuracy to be tested	Optional for hard cases
Missing-document and incomplete-record detection	Feasible (mostly rules)	Not needed
Natural-language questions over operational data	Feasible, read-only	Optional
Drafting quotations, estimates, work instructions, inspection plans and reports from approved templates	Feasible with smaller models; quality limited	Optional for better quality; usage charges
Management summaries	Feasible	Optional

Local models need suitable hardware (a GPU workstation is the usual choice) and carry no usage charges. External services are optional, charged by their providers, and off unless DSEW enables them. Their charges and any local GPU hardware are not in the fee.

10. Commercial headings you asked for

#	Heading	Position
1	Requirement analysis and system design	Included (Option 1: ₹12,000; Option 2: ₹25,000)
2	UI/UX design and prototyping	Included (Option 2: ₹20,000; Option 1: mock-ups of printed formats and key screens inside the workflow design line)
3	Development charges by module	The module tables in sections 3 and 4
4	Third-party software and licences	None
5	AI model and API costs	Scoped AI in Option 2 only; external service charges and GPU hardware not included
7	Data migration and initial configuration	Initial master-data setup included (CSV import of agreed masters); cleansing and bulk historical migration excluded
8	Testing and deployment	Included in the implementation lines
9	Training and documentation	Included in the implementation lines
10	Server, infrastructure and cybersecurity	DSEW's own costs, estimated in document 2; security measures in document 2; independent penetration testing excluded

#	Heading	Position
11	Annual maintenance contract	None. The first 12 months are covered by the bundled fee; later support is a renewal agreed in writing
12	Warranty and post-deployment support	The bundled fee in section 7
13	Change-request rates	Each request is quoted separately and approved in writing; no rate card is published
14	Recurring per-user, per-module or subscription fees	None, apart from the ₹8,500 a month for the first 12 months
15	Taxes	GST at 18% on all fees (see section 1)

Cost over three to five years. Fixed today: the option price plus ₹1,02,000 in the first 12 months (₹4,27,000 or ₹5,82,000 ex GST). Not yet priced: support after 12 months and any later enhancements. DSEW's own infrastructure is estimated in document 2. No third-party licence fees apply.

11. Ownership and licence in short

Verity, including everything configured or developed for DSEW, is owned by PlotArmour and is licensed, not sold. DSEW owns its business data and can export it. **Source code is not delivered.** Full terms are in document 3; several clauses are still to be settled with counsel.

12. What we have and have not verified

Verity's foundations (data isolation, permissions, audit, stock, manufacturing orders, QC checkpoints, project jobs, approvals, QR identity) exist and have been run on our test environments with fictional data. Revision-controlled BOMs, controlled documents, structured test records and the modules beyond them are completed during the project. We have **not** yet tested on DSEW's host or on Windows Server 2019, run a real-phone HTTPS upload, rehearsed the combined database, files and identity restore, or run the outage tests. These are go-live gates (document 2); **production use is blocked until they pass.**
