verity

Proposal for Stylified

A Verity workspace for piece-rate production: lots, bundles, karigars, supervisors and the owner's view, hosted and supported by PlotArmour.

DRAFT FOR REVIEW

PREPARED FOR

Stylified
Garment manufacturer, Ludhiana, Punjab

PREPARED BY

PlotArmour
team@plotarmour.in · +91 87440 69597

DATE

22 October 2026

VALID FOR

30 days

The offer in one page

Stylified gets a working Verity workspace configured for its own way of paying karigars by the piece, with a screen for the owner, the manager, the supervisor and the munshi. You pay a small one-time customization fee and one monthly fee that covers the server, upkeep and the software itself.

ONE TIME

₹29,500

₹25,000 customization plus 18% GST (₹4,500). Paid in two parts.

EVERY MONTH

₹15,000

Server, maintenance and subscription together, GST included.

MINIMUM COMMITMENT

₹74,500

The one-time fee plus the first three months. After that, 30 days' notice.

Confirmed. The monthly fee is ₹15,000 *per month, with GST already included*: ₹4,500 server, ₹4,000 maintenance and ₹6,500 subscription. The one-time customization fee is ₹25,000 plus GST.

01 What we are offering

Verity is PlotArmour's own operations platform. For Stylified we configure a hosted workspace on it for the piece-rate cycle your requirement sheet describes: a lot is cut into numbered bundles, each bundle moves through the stages (pasting, collar and cuff, stitching, button and kaj, finishing and press), each stage is given to a karigar or an outside unit, and what comes back is counted as good, rejected, rework or short. Wages follow from the wage basis agreed for each karigar, and the owner sees all of it on one screen.

The workspace is yours alone: your data is isolated from every other Verity customer, every entry shows who made it and when, and mistakes are corrected by reversal, never by editing history.

02 Price and payment

One-time customization

ITEM	AMOUNT (₹)
Customization of Verity to Stylified: the MVP scope in document 2, supervisor and manager screens, role set, bilingual labels, seeded demonstration, training and go-live	25,000
GST at 18% (IGST expected: PlotArmour is registered in Delhi, Stylified is in Punjab; confirmed at invoicing)	4,500

ITEM	AMOUNT (₹)
Total one-time, including GST	**29,500**

Payment: 50% (₹14,750) at kickoff and 50% (₹14,750) on go-live acceptance.

Monthly fee

COMPONENT	WHAT IT COVERS	PER MONTH (₹)
Server	Hosting in an Indian data-centre region, database, file storage for photographs, security patching, monitoring. Stylified pays no separate hosting or provider bills	4,500
Maintenance and support	Fixes, small configuration changes, user and role changes, support on working days, a backup and restore routine	4,000
Subscription	The right to use Verity and every improvement we release to the platform during the term	6,500
Total per month, including GST		**15,000**

For reference, ₹15,000 including 18% GST is ₹12,711.86 plus ₹2,288.14 GST. The monthly fee is billed as one invoice, in advance, starting on the go-live date.

Lock-in

The monthly fee has a **3-month lock-in counted from go-live**: Stylified commits to the first three monthly invoices (₹45,000 including GST). After the lock-in the service continues month to month and either side may end it with 30 days' written notice. Stylified may export all its data at any time (document 3, section 6).

Where it runs

Stylified's workspace is hosted by PlotArmour on Verity's hosted platform, with Stylified's data isolated from every other customer. Stylified can later ask to move the workspace to its **own Vercel and Supabase accounts, in Stylified's name**. That move is an option we will quote separately and offer once we have validated it; it is **not part of this MVP** and we do not promise a date. If it happens, the provider charges for those accounts stay inside the ₹4,500 server line (the accounts are Stylified's, the bills are paid by PlotArmour), Stylified can revoke our access at any time, and the ₹15,000 monthly fee does not change. Until then, Stylified can export all its data whenever it asks (document 3, section 6).

03 What is included in the MVP

The full scope, screen by screen, is in document 2. In short, the MVP gives each person the screens their job needs:

WHO	WHAT THEY GET
Owner	Factory dashboard (where every piece is, what is late, what is owed), lots and bundles, karigar accounts, all reports, approvals overview

WHO	WHAT THEY GET
Manager	Everything the owner sees except wage rates; approves deductions, shortage write-offs and lot hold or close within limits the owner sets
Supervisor NEW	A phone-first floor view for their stages: what is out, what is due, receive and inspect returns with a photo, reissue rework, raise shortages, close the day
Munshi	Daily entry: cut bundles, issue, take back, record advances and payments, print slips

Also included: bilingual (Hindi and English) slips and entry labels, a lot cover photograph and defect photographs on rejected or rework entries, in-app alerts for late returns, a reset-able demonstration with fictional data, and a half-day training session.

04 What is not included

These are in your requirement sheet and are real, but they are not part of this MVP or this price. Each is quoted separately when you want it (document 2, section 7): fabric inward and the metre ledger; twelve-category lot costing; packing and dispatch; bundle and lot split or join; a full Hindi interface; the Store Manager role; configurable alert thresholds; an audit viewer; native Excel and PDF export; barcode scanning; and the move to Stylified's own Vercel and Supabase accounts described in section 2.

05 Timeline

WHEN	WHAT HAPPENS
Day 0	You approve this proposal. Kickoff call: confirm the fourteen build decisions in document 2, section 6, and the user list
Week 1	Roles and supervisor floor view and receive-and-inspect screen
Week 2	Reissue board, rework and shortage register, day close, photographs, bilingual labels. **Demonstration to you at the end of week 2**
Week 3	Your feedback, hardening, training, go-live on your own workspace

About three weeks from kickoff. These are estimates, not fixed deadlines: they assume the agreed scope, your decisions at kickoff, a few days of your own testing, and one consolidated round of feedback.

06 What we need from Stylified

- Your approval of this proposal and of the fourteen decisions in document 2, or your changes to them.
- The list of users and their roles, and which stages each supervisor looks after.
- Your stage names, karigar names and rates to load on launch day (or we start empty and you enter them).
- A named person who decides for Stylified and consolidates feedback, available on working days.
- A phone or tablet for each supervisor with a working internet connection (the MVP is online only).

07 Terms in brief, and validity

The service terms (hosting, support hours, backups, data ownership and export, termination, change requests, confidentiality) are in document 3. This proposal is valid for 30 days from 22 October 2026. Prices are fixed for the MVP scope and are not discounted further. Anything outside the MVP scope needs a written change request with a price and a schedule before work starts.

To go ahead: reply to team@plotarmour.in with "Approved" and the name of your decision-maker. We will send the first invoice (₹14,750) and the kickoff date.

PlotArmour, 31/44 St 3, Block 17, Vishwas Nagar, Delhi 110032 · GSTIN 07TQDPS9711L1ZT · team@plotarmour.in · +91 87440 69597.
Stylified's registered name, address and GSTIN are completed before the first invoice.
