Who we are, and what Verity is

This document states only facts the company has supplied. It makes no claim about clients, references or credentials beyond those listed.

01 Company

NAME	PlotArmour
REGISTERED ADDRESS	31/44 St 3, Block 17, Vishwas Nagar, Delhi, India, 110032
GSTIN	07TQDPS9711L1ZT
PHONE	+91 87440 69597
EMAIL	team@plotarmour.in

PlotArmour owns and develops **Verity**, an operations platform for service and manufacturing organisations.

02 Why Verity suits Stylified

Verity is a modular platform: the same foundation (data isolation per company, role-based permissions, audit trail, append-only ledgers, approvals, notifications) carries every module, so new roles, stages and users are added without redeveloping it. Stylified's needs are a piece-rate cycle with careful counting, honest money and a known cost for every lot, which is what the piece-rate module on that foundation does.

CAPABILITY	STATE	FOR STYLIFIED
Per-company data isolation, role and permission model, audit trail, approvals, notifications, file storage	Platform, in use across Verity	Six roles, limits you set, photographs
Lots, numbered bundles, slips and labels with QR, scanning	Piece-rate module, tested, shown on fictional data	Your stages, rate card, numbering and challan heading
Give out and take back with the receiver's count, cases, charge requests, rework, wage bases, advances, deductions, payments	Piece-rate module, tested, shown on fictional data	Your karigars, rates and reasons
Ready garment inventory: opening stock, stock out, count corrections, a reversible ledger	Piece-rate module, tested, shown on fictional data	Your designs, parties and stock

CAPABILITY	STATE	FOR STYLIFIED
Fabric rolls, stock, labels, lot costing with shared bills, cost per good piece	Piece-rate module, tested, shown on fictional data	Your fabrics, suppliers and cost categories
Team: roles, people, stages, karigar profiles, a supervisor per karigar, username sign-in	Piece-rate module, tested, shown on fictional data	Your people
Reports with Excel, CSV and PDF, a change history, a factory dashboard	Piece-rate module, tested, shown on fictional data	Your lots
Hindi and English on the floor screens, daily entry, slips, and the munshi's and store's daily screens	Built	Your labels and reasons in both languages
Join or link lots with cost moved between them, and the Today page	Built	Reversible, with the source lot's records untouched
Hindi on lots, costs, reports and settings; a Zebra file tried on your printer, or a TSC file; packing and dispatch; WhatsApp and SMS; Tally export	Not built	Quoted separately when you ask

03 Experience

PlotArmour has completed **10+ past projects, with values from ₹1 lakh to ₹20 lakh**. We do not claim, in this document, previous deployments in garment manufacturing or piece-rate payroll. The piece-rate module is our own product, built from your requirement sheet and the working chat with your team, and tested against the sheet's own worked examples. Further detail on past work can be discussed under a confidentiality agreement (document 3, section 10).

04 Leadership, teams and support

NAME	ROLE	BASED IN
Divyom Sharma	Co-Founder & CEO	Delhi
Nakshatra Aggarwal	Co-Founder & CEO	Edinburgh, UK
Shubhankar Rakshit	CFO	Delhi
Ayushmaan Gaur	COO	Chennai

The people and allocation for this project (project management, build, testing and go-live) are confirmed in writing at kickoff.

Support and escalation: team@plotarmour.in or +91 87440 69597, on the hours in document 3, section 4.
Escalation contact: Shubhankar Rakshit, CFO.

05 How a Verity workspace feels

One system, every role

The owner, the manager, the supervisor and the munshi use the same product with different screens. What each can do comes from their role, checked on the server.

Honest numbers

Good, rejected, rework and short are kept apart and never mixed. Every figure on a dashboard is worked out from the entries behind it, so a number can always be traced to the entry that made it.

Made for a phone on the floor

Supervisor screens are designed for a phone first: scan a bundle with the camera, large touch targets, counting with plus and minus, a photograph from the camera.

Dark and light

Every screen works in a dark and a light theme, so it is comfortable in a bright cutting room and on an evening shift.

06 Demonstration

We can show the piece-rate module on fictional garment data at your premises or remotely, and we will say clearly what runs today and what is not built. The demonstration script is in document 2, section 9.

07 Confidentiality

We will sign a mutual confidentiality agreement before Stylified shares sensitive information, and we treat your requirements, rates and business rules as confidential. Support access to your workspace is recorded in your audit trail. At the end of the service we delete or return Stylified's material we hold, as set out in document 3.
